- Git, Github

## VOLUNTEER WORK

---

### Internship

Computer Services • Lac 1

Jun 2023 - Aug 2023

Development of a project management system using Spring Boot and Angular, The system integrates features like task tracking, user roles, and real-time updates to enhance project collaboration and management.

### Internship

Kicksoft Studio • Manouba

Jan 2024 - May 2024

Designed and implemented a marketplace platform with a bidding system using the MERN stack. This involved developing a responsive front-end with React.js, creating RESTful APIs with Node.js and Express.js, and managing data with MongoDB. The system supports real-time bidding and user interactions, ensuring a dynamic and scalable auction experience.

## PROJECTS

---

### Project Management:

Led the development of a project management system using Spring Boot and Angular, streamlining workflow processes and enhancing team collaboration for efficient project delivery.

### Market Place with Bidding System:

Designed and implemented a market place platform with a bidding system using the MERN stack, providing users with a versatile platform for buying and selling goods through interactive bidding.

### Messaging system:

Engineered a real-time messaging system using the MERN stack with Socket.IO integration, enabling instant communication and seamless interaction among users within the application.

### Portfolio:

Created a responsive and animated portfolio website using React and Framer Motion, delivering a visually engaging and interactive user experience with smooth transitions and dynamic effects.
